

Competition is good if not an excellent way to control prices. Traditional radio stations have many advertisers to cover expenses. XM radio relies on it's customer base and fees. I do not see how allowing XM radio to provide instant traffic and Weather reports will affect local radio stations. Most local stations in my area rarely provide traffic reports during the day, and if they do there is 15 to 30 minutes in between reports. To that end, I do not see how allowing XM radio will financially impact the local stations. I believe that XM radio should be allowed to continue to provide Instant traffic and Weather to it's customer base.
